Decoration Day Will C Held By The Local Legion

Will Meet in Club Room
Sunday at 1:30

Officials of the local Legion have made arrangements to hold a decoration day at the local cemetery on Sunday next at 1:30 p.m.

Members of the Legion are requested to meet at the club rooms at 1:30 and march in a procession to the cemetery.

A short service will be held at the cemetery and graves of deceased members and relatives will be decorated.

HOMER MARKETS

The best market is always the home market. This is true in the case of agricultural as well as other products. One of the biggest drawbacks to western agriculture is that the home market is not large enough to take the bulk of its output.

The Canadian distillery of Hiram Walker and Sons at Walkerville, Ontario, is one of the best known in the Dominion for the grains produced in Alberta farms. The purchases of the firm in this province greatly exceeds the amount of sale in Alberta. This is the direct result of most manufacturers in Western Canada.

If Canada did not have any whiskey distilleries all such liquors would have to be imported and the grain needed in the making thereof would be supplied by farmers in other countries. Hiram Walker stated his distillery on Canadian soil opposite Detroit, in 1858. There was a chance he would build in Michigan, but adverse legislation then in effect in that state prevented him. Now the produce of this distillery "Canadian Club" whiskey is one of the best known and most widely distributed in the world and the grain required in the making thereof is supplied by Canadian farmers. Hiram Walker's distillery are not only one of the largest distilleries in the British Empire but they also own the largest distillery in the world.

"People 4000 miles away have no right to tell you what you want," Mr. Aberhart is reported as saying at Lac La Biche. Does he mean Macens, Powell and Irvine, who came a longer distance than 4000 miles to dictate to the people of Alberta?

Free Delivery of The C. P. R. Freight

Will be Handled in Future by
J. Bergeon's Truck

The Canadian Pacific Railway Company has established Pick up and Delivery service in Redcliff.

All shipments of freight either received or forwarded between points in the territory Prince Albert, Saskatoon, Regina and North Portal on the East of the Alberta boundary on the West, will be handled free of charge between the customer and the Canadian Pacific Railway Stations.

All shipments of express matter regardless of shipping point or destination will be handled free.

The service will be performed by Joseph E. Bergeon's Redcliff Transport and the truck will leave the station daily at 2 p.m.

Aberhart Says Going With Bank Legislation

Regardless of the action if the Dominion, the Alberta government is going ahead with the recently passed legislation, "consolidation of banks and banking within the province," Premier Aberhart told a social credit scale at Edmonton yesterday. The Premier was referring to the legislation which the Dominion government disallowed Tuesday. He did not explain how the Alberta government would attempt to "go ahead with" the legislation.

Navy League Does A Valuable Work

Organizer Paid Visit to Redcliff
Last Tuesday

Referring to support the Navy League of Canada in its work of assisting widows and orphans of men of the merchant marine and their dependents; maintaining Sailors' Homes and Institutions etc. etc. in our large Canadian ports from coast to coast and looking after the welfare of the seamen when ashore; training boys and young men and helping to make better Canadian citizens of them; the citizens of Redcliff subscribed \$3.50 to this cause in a recent campaign here conducted by Fred Cooke, organizer of the Alberta Division, 1107 - 15th Avenue West Calgary Alberta.

TOWN OF REDCLIFF

The Local Tax Arrears
Consolidation Act

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing.

All consolidated arrears or taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act.

Any person, firm or corporation who is the owner of any parcel of land in the Town of Redcliff, against the title of which, there is a pending notice of foreclosure for arrears under "The Tax Recovery Act 1920."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application in the case of lands which have been finally acquired by the Town of Redcliff, or such person's personal representative.

In such cases where the applicant's property is to be expropriated for sale at the forthcoming Tax Sale on Sept. 15th, 1917, such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the application, the Secretary Treasurer shall calculate the amount required to pay the arrears of tax, if the same were consolidated, and the applicant shall deposit with the Secretary Treasurer one fifth of such sum.

In such cases where the applicant to consolidate is made after the 5th day of November 1917 the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current year's taxes.

In any event the current year's taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted, the deposit shall be applied on the applicant's consolidated arrears, otherwise it shall be repaid to him.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs.

No buildings, fences, fixtures or other improvements shall be

Soft Ball Girls Win From Brooks

Were Entertained to a Dance
After the Game

Last Friday evening the Brooks Girls Softball team played a game with our town girls here. As they arrived late the game was called off in the 15th inning on account of darkness. The local girl won out by 5 runs to 1 and it was one of the best games of the season.

Both teams played a snappy game and the crowd was disappointed when they could not complete the full innings.

After the game the visitors were entertained to a dance in Cliff Hall which was well attended and thoroughly enjoyed.

Rev. Hollinger Passes

The Rev. David Hollinger, 85 years old, of the Church of the Immanuel, Redcliff, died last Wednesday, Aug. 11th, at 1:10 p.m. at his late home on Switzer street, Genoville, following an extended illness from pneumonia.

The deceased who during the past half century had served many churches in Durke and neighboring countries, was well known throughout western Ontario. He leaves a widow and several other relatives.

The late Mr. Hollinger was a resident of Redcliff for a number of years and conducted services here. He left here for Genoville, Ontario, in 1913. Deceased was a highly respected citizen among many friends in this district.

removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1920 are suspended in respect to the properties involved while such consolidation agreement is in force.

Town of Redcliff

Notice is hereby given that under the provisions of the Tax Recovery Act, 1920, the following lands will be offered for sale by public auction, in the Town

LOT	BLOCK	PLAN

"That portion of the Easement nine hundred and seventy-two (72) feet of 1/2 South West corner of Section Eight (8) in Township Thirteen (13), Range Six (6) West of the Fourth Meridian."

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservation contained in the existing certificate of title. Terms cash. Redemption may be effected by the payment of the full amount of arrears of taxes and costs at any time prior to the sale.

Dated at Redcliff, Alberta this 23rd day of July 1917.
F. V. BRITT,
Secretary-Treasurer

Some Little Known Facts About Safety

Railway Accidents Are Much
Less Than Motor Cars

It is impossible to read the daily newspapers without having some general idea that highway operation is still an exceedingly dangerous mode of transportation.

In 1915, according to the Dominion Bureau of Statistics, the total deaths from automobile accidents in Canada was 1,164 and of these about one half were drivers or passengers. During the same year 20,389 persons were injured as a result of motor accidents. Over one half of these were drivers of passengers.

Deaths from motor accidents have averaged over the past ten years 172 for every 10,000 cars registered, or nearly one for every thousand. This means that if you drive a car for ten years you have one chance in 100 that it will be involved in an accident causing injury to someone.

By way of contrast, the average rate of accidents to passengers on the railways in Canada for the past four years has been just over nine per annum.

These figures mean that a person can expect to travel nearly 157,000 miles before he would be killed; or if he traveled at an average of 40 miles per hour, including stops, and kept it up continuously for more than 425 years he may be killed riding on a railroad train and he may expect to travel about 4,000,000 miles without being injured.

According to rumors current in Montreal and Ottawa the next few months are likely, the Toronto Star reveals, to witness a major reorganization of the Mackenzie King cabinet with Lord Charles A. Dunning, minister of finance, retiring from political life and his place being taken by J. L. Baley, at present minister of national revenue.

Ottawa Acts Curb Alberta

Bank Control

Premier King Says Act Beyond
Provincial Legislature

Social Credit Legislation passed at the recent meeting of the legislature has been announced from the federal government that it has disallowed the three statutes in question and nullified as completely as if they had never been enacted.

The order-in-council adopted by the Dominion Government was under authority of the power vested in it by the British North America Act.

It appears that from this action there is no appeal.

Move to halt operation of these acts was taken when Mr. Aberhart declined to cooperate in a reference on their validity to the Supreme Court of Canada. This would involve suspension of their operation until reference had been determined but Mr. Aberhart had indicated his determination to put them in force on Aug. 27.

Prime Minister Mackenzie King stated the acts were beyond the powers of the provincial legislature and constituted an infringement upon the reserved powers of the Dominion. Jurisdiction of the central government over the money and banking has never been seriously questioned in the 70 years since confederation, he declared.

Alberta S. C. Members Met in Caucus

Say Action Proves The Banks
Control Policies

Social Credit members in caucus yesterday forwarded a wire to Prime Minister King declaring that "your vote of Alberta legislation proves your government is no exception and precipitates this constitutional crisis for which you may be held responsible." They charged that a serious crisis existed and that banks control government policy.

Geological Surveys And Investigation Program Have Brought Results

Editors' unclassified report, believed favorable for gold production in the west and copper-nickel-silver in the east have been published this year by the federal \$10,000,000 geological surveys and investigation program, Dr. Charles Camsell said at Vancouver.

Although the geologic parties have not yet had time to compile their complete reports, the program has been successful in clarifying those western districts, the deputy minister of mines told delegates to the thirteenth meeting of the Canadian Institute of Mining and Metallurgy.

The program, which got under way last June, involved 60 geologists spread over the Yukon, Northwest Territories and every Canadian province with the exception of Prince Edward Island. Close to 1,000 persons were employed in the field parties which engaged the geological and topographical surveys.

The remains camps of the Yellowknife river district in the Northwest Territories, disclosed approximately 2,500 square miles, or 30 per cent of the area, could be classified as good prospecting territory, the deputy minister said.

Another project indicated some 200 square miles in Manitoba could be considered favorable for gold occurrence, and some unexplored areas with similar possibilities were noted in Saskatchewan.

The party working in the Cranbrook area of British Columbia found that tests should be made of certain tertiary gold-bearing gravels which have been given considerable study. Dr. Camsell said, while examination of mining properties in the vicinity of the main line of the Canadian National Railway in the coast provinces has directed attention to the economic possibilities.

In the east perhaps the finding of copper-nickel mineralization of the Huronian type in the vicinity of the coast provinces has directed attention to the economic possibilities.

Dr. Camsell said, while examination of mining properties in the vicinity of the main line of the Canadian National Railway in the coast provinces has directed attention to the economic possibilities.

Maritime Freight Rates

Camsell Declares Freight Rate Act Is Unconstitutional

Ottawa, Canada, reported an application before the board of railway commissioners for Canada at Montreal, N.B., created a sensation by declaring the Maritime Freight Rate Act was unconstitutional. The "primary objection," came from Joseph Rodriguez, K.C., representing the Ontario department of agriculture at the hearing of the maritime transportation commissioner's application for a reduction in policy rates.

"I am a little afraid to answer my friend now," responded C. J. Burdell, K.C., Halifax, counsel for the commission. "Afraid that if I said what I would like to say I would say too much. So I had better think over what I am going to say. I am just as quiet as a mouse as I can that Ontario is still part of Canada. It is not a foreign country. Hereafter, we have had entire sympathy from Quebec in our problems down here."

Mr. Burdell had outlined a claim for extending to the maritime provinces a reduction of three cents a bushel, granted in the freight rate reduction in 1924 by the Maritime Freight Rates Act, which gives the maritime a transportation advantage of a 20 per cent, reduction in freight rates.

The Maritime provinces, which have been given considerable study, Dr. Camsell said, while examination of mining properties in the vicinity of the main line of the Canadian National Railway in the coast provinces has directed attention to the economic possibilities.

The SNAPSHOT GUILD

MAKE A SILHOUETTE

Silhouettes make excellent greeting cards, book plates, and place cards.

With the arrival of colder days and nights that do not offer equal encouragement for outdoor activities, there is a noticeable increase in interest by someone in making a silhouette of a person or object.

Once you start this fascinating hobby you will undoubtedly agree that it is a real pleasure and an ideal way to occupy your time profitably during the long evenings of fall and winter.

All of us are familiar with the ordinary type of silhouette but few have made silhouette pictures. With this type of picture, even more than with ordinary pictures, is important that the picture tell their own story—unless, of course, you want simply a record of a person or object.

The first essential of silhouette pictures is a perfectly flat background, direct light, and a subject placed directly back of the light source. To obtain such a background is to stretch a bed sheet across a line doorway between two rooms. It is important that the sheet be tacked up so that all creases and wrinkles are eliminated.

To light up the background, a strong light must be put in back of it, about five feet away, either centered or placed directly back of the main feature of the picture. You have a wide choice of lamps for lighting. You can use a couple of

ordinary 60-watt bulbs such as you use in your home lamps, or a Photo Flood or Photo Flash bulb. The latter are available in most electrical or photo supply shops at very low prices. The Photo Flash bulb gives an exceptionally brilliant white light, probably your best bet. Its life is about two hours of constant burning, thus it can be used for many pictures. Place your subject about two feet in front of the sheet and the side away from the light.

Diagram. Place your camera on a tripod or table so that it is directly opposite your subject. When the picture is taken, the light that illuminates the sheet should be the only light in either of the rooms.

Now about exposures. If you use the two 60-watt lamps, you will need an exposure of about 1/100 second with the lens wide opened; with a Photo Flash, a couple of seconds will suffice. Using the Photo Flash which gives an instantaneous, vivid flash of light, set the shutter at "1/100" and then you are—you've got your picture.

Little practice with silhouettes is worth volumes of instruction. Once you have made a few silhouettes for greeting cards, book plates, place cards, etc., you will be in a position to make more.

In making them, you can call at your imagination and inventiveness into play. Try it tonight.

Sowing Rice From Plane

Method Carried Out In Russia On Large Scale

Visited To Urals Where he has been surprised to see airplanes swooping over the fields and bombing them with rice. This method of sowing has already been tried out with some measure of success in other parts of Russia, and it is now being carried out on a much larger scale. Sowing by airplane has great advantages. It does not depend on the weather, and it is more being carried out on a much larger scale.

Domestic radiotelephone service has just been inaugurated in China.

Dish Towels Needn't Be Dull

Household Aids by Alice Brooks

These Maids are Gay and Colorful

PATTERN 5197

The bride-to-be proud of her home—what friend who's collecting linens for her hope-chest—your mother or mother-in-law, both of whom like a bright, cheerful kitchen—are just a few of the many on your gift list who would love one or a set of these gay cross-stitched towels.

They are easy to make and give you an opportunity to show your skill in cross-stitching. In pattern 5197 you will find a transfer pattern of six motifs averaging 1 1/2 x 3 inches. Material requirements, illustrations of all stitches used.

To obtain this pattern send 25 cents in stamps or coin (not preferred) to Household Arts Dept., Winnipeg Newspaper Union, 275 McDermott St., Winnipeg.

There is no other Housewife pattern book published

Australia Is Said To Be The Third Best Customer Of Canada

Canadian Cattle At Glasgow

High-Disease Porting Baited Shipments Prices At Sale

There were plenty of evidence that Canadian cattle are popular in Scotland at a special sale conducted recently by Wm. Bousworth and Sons at Merchants Wharf, Glasgow, to dispose of a shipment of Canadian beef and dairy cattle. Bids came freely, and all the animals were disposed of at satisfactory prices.

The auctioneers stated that the dairy cows were the first lot offered for many months, and were of excellent types and breeding. In order to ensure that only the very best class of Canadian cows would be exported, the Canadian Government had imposed strict regulations providing that all cows for export to the British market must pass an official tuberculosis and blood test prior to shipment. Any cow failing to pass such test will not be allowed to leave the Dominion. Further action by the Canadian Government provided for skilled supervision of all export shipments as to class, breed, type, and conformation of the animals to be shipped.

As the Canadian government had full power to control the export of cattle, it was not surprising that the British market must pass an official tuberculosis and blood test prior to shipment. Any cow failing to pass such test will not be allowed to leave the Dominion. Further action by the Canadian Government provided for skilled supervision of all export shipments as to class, breed, type, and conformation of the animals to be shipped.

As the Canadian government had full power to control the export of cattle, it was not surprising that the British market must pass an official tuberculosis and blood test prior to shipment. Any cow failing to pass such test will not be allowed to leave the Dominion. Further action by the Canadian Government provided for skilled supervision of all export shipments as to class, breed, type, and conformation of the animals to be shipped.

"Australia is now Canada's third best wool market, ranking immediately after the United Kingdom and the United States. The trade balance between the two Dominions is three to one in Canada's favor," said L. R. Macgregor, Toronto, Australian trade commissioner for Canada.

During the last Canadian wool year ended March 31, Australia's purchases from Canada included 204 million feet of lumber; 12 million tons of canned salmon; 100,000 tons of sawpilot and 18,181 automobiles. Mr. Macgregor pointed out.

At the same time, Canada bought from Australia, 15,000 tons of raisins and currants; 100,000 cases of canned fruit; 71,000 gallons of wine; 4,000,000 pounds of wool and 300,000 of new sugar.

The active trade balance for Canada was attributable to the trade agreements of 1921, which in turn were an extension of the trade agreements negotiated in 1925 by Mr. Robt. Healy.

Australia came out of the depression fast, Mr. Macgregor said. Unemployment among trade unions was down to 10 per cent in 1935, and now rises to 17 per cent; export rose from \$80,000,000 in 1931 to \$90,000,000 in 1934, higher than any year since 1929-30. Practically all business activities were showing improvement.

Since 1932 any fear that government finances would be allowed to drift has been dispelled by the pre-war budget of 1934, which was cut in all provinces. Moreover the control of the London-Australia exchange has been maintained at a level of about three and a half years of absolute stability despite the vagaries of "starving."

In June 1935, there was an increase in deposits in Australian savings banks of \$35,000,000 over the same period of the previous year. The banks now total over a billion dollars and the present level has been reached in the history of the savings banks in Australia, 1928 and '29."

Unemployed Grow Jobs

Raise Su Ku Brills By Are Highly Puffed By Officials

Unemployed in Port Credit, Ont., have started a new industry.

In place of beavelling competition from Ontario, men made with cheap Chinese labor, they have turned the tables. What to more, they are making a last money profit doing so.

It all started some 10 years ago, when a number of Chinese started raising the Su Ku bulls on the marshes bordering the banks of the Credit.

For some time they flourished and sold their product, a bulb which printed red ink on any surface—vegetable, paper, etc.—and was highly valued.

For some reason the venture was abandoned and nothing was heard of the Su Ku until recently when the bulbs were rediscovered the bulb, which had been abandoned, was found growing profusely. Several unemployed were quick on the pick-up, and they could be said to be quantities to Toronto Ontario and so the industry began.

Village authorities are backing the men in their venture and have placed a ban on Orientals, who might wish to revive the business on their own account. The unemployed, as said the village fathers, shall have undisturbed claim to the Su Ku and the Credit.

New Kind Of Flower

Specimen In Hatched Tower Aquarium Lives On Fish

"The latest additions to the Hatched Tower Aquarium are specimens that live on fish. They are placed in a tidal pool, connected to the sea by pipes, and although the specimens are open their vivid petals and, wrapping themselves around the fish, suck them in. The people have heard of flowers that close immediately before their eyes and other insects lodge inside them, and in the tropics there are larger specimens which consume small birds and mice. Scientists say that they extract the blood from the small animals and birds and use the carcasses. One, a Japanese flower, lure mice into its mouth and then swallow them whole. It is a most curious and even goes with its poisonous fumes.

Mount Mauna was named years ago after it disappeared into the earth. Crater Lake, Oregon, rests where once stood this mighty mountain peak.

Ticks can live eight months without water and three years without food, recent say report.

Alberta Buffalo For Germany

Collection Of Live Moose And Buffalo To Be Shipped Soon

Collection of live moose and buffalo from Alberta and an extensive research into the habits, biology and preservation of big game here has been completed by Dr. Lutz Heck, director of the Zoological Gardens, Berlin. Between eight and 10 moose and 10 and 12 buffalo from the province will be shipped to Germany to be used for experimental breeding purposes to improve native game, the baron explained.

Preservation of big game through the world for posterity is sought by Dr. Heck. As much as possible, the results analyzed the professor will release the information to the Canadian government as well as his own government for their mutual benefit.

Dr. Heck said, while examination of mining properties in the vicinity of the main line of the Canadian National Railway in the coast provinces has directed attention to the economic possibilities.

Interesting Local Items

Mr and Mrs Newham and
family are at present spending
their holidays at Bonif.

Mrs E. I. Stone is at present
visiting her two sisters in
Winnipeg.

The local Soft ball girls are
arranging for a several days
trip east to play games with Sask
teams.

Mr Grey and children of Vin-
cent, and Mrs Nels and son of
Morris Alta are at present vi-
siting their parents Mr and Mrs H.
Johnson.

Mr D. Bonifant, who has been
teaching in White Horse for a
number of years, has decided to
remain in town with his mother
and sister.

Mr N. McElroy, Manager of
the Dominion Glass office was
called here to Montreal on ac-
count of the serious illness of
his father, who passed away last
week.

Employees of the Dominion
Glass plant held their annual
picnic at the river south of town
last Sunday afternoon. Mem-
bers of their families were also
present. An interesting program
of sports was put on and all
thoroughly enjoyed the outing.

The Review has had a sample
of the Vacuum Filler Sealless
Fountain Pen, which has been
recently invented will be intro-
duced at low prices at W. H.
Dacre's store next week. These
are exceptionally fine pens.

1-3 over the adv. in this issue
and inspect them at Mr Dacre's
Store. They will be wonderful
pens for school pupils.

"School Bound?"

—Asks JANE DEE

GOING away to school this
Fall—to College—to
Normal—or to train for
a career? If you are, it's time
to be planning your wardrobe.

You'll be surprised how the
correct clothes will add to
your equipment and on accoun-
t of this will help the budget
problem.

It is not necessary to spend
lavishly to be smart. A little
careful studying of what you
actually need, and knowing
how to combine your wardrobe
will help the budget
problem.

Why not write to me and tell
me what your plans are for
the Fall? Of course you must
give me a complete descrip-
tion of yourself—your color-
ing, height, weight, best meas-
urements, etc. I will be glad
to help solve your problems,
or do not hesitate to write.

Jane Dee
